

SR 520 Bridge Replacement and HOV Project Community Involvement Approach 7/22/03

Advisory Committee: Umbrella committee to focus on corridor-wide issues, and to consult with project on significant issues rising from other community outreach efforts.

***New!* Local Sounding Boards:** Less formal than Advisory Committee, invited membership in coordination with jurisdictions and community groups; will focus on local community questions about impacts and design.

Community Meetings and Workshops, Public Information Events: Events focused on broad community populations for community-focused presentation of project findings and discussion of impacts.

Community Organization Briefings: Presentations and discussion with existing local community and neighborhood groups, civic organizations, and business groups.

Special Events: Examples include tours of project area and sensitive areas, to highlight issues of importance to policy makers and public.

Project Dialogue Center: Call-in and email center to accept comments, provide contact information, project status, and meeting locations.

Newsletters, Brochures, Website, Email Communication: Written and published materials to track status of project, document key issues, and publicize special outreach events.

***New!* Noise Wall Project Outreach:** Work with communities in SR 520 and I-5 interchange areas specific to design and site noise walls (funded separately by legislation).
